

PARKING-LOT DETENTION / CONCEPTUAL LAYOUT

Same 4200 m² contributing study area in all cases · Dimensions in metres · No construction design

FLOW ARROWS ARE SCHEMATIC · No surveyed grades or pipe network assumed

A-A | IDEALIZED CONSTANT-AREA SECTION

150 m³ nominal capacity

$V = A h$; constant area 200 m²

Vertical boundaries are a storage idealization. Side slopes, freeboard, structural walls, tailwater, and a physical spillway have not been designed. Overflow is an accounting boundary only.
